(leathered) and cast iron conveyer. In every particular, they are constructed in the very best manner in every part; they run easily, are easily tended, and are adapted to be driven by gear or by bands, requiring about 1,460

HORSE POWERS.

For Powers with which to drive my Threshers, I have selected, as being the best now in use, Pitts' Improv-ed Patent Double Pinion Power.

These Powers are made by me in the most thorough manner, of the best material, and are of double the strength of my single geared Power.

In the Pitts' Power, I am making shaft of the bevel wheel, and master pinion of CAST STEEL, which is a great improvement over the Iron Shaft used by other manufacturers.

Price List of Threshing Ma-

FREMONT, OHIO. 1864.

LIQUOR HOUSE NEW GOODS! AND Family Grocery Store.

Threshers & Separators!

In the manufacture of Threshers and Separators, I have aimed, in the first place, to select the most approved patterns—such as have been tried and found to give satisfaction, holding myself ready at all times to adopt such improvements as experience may suggest as being desirable. In the next place I have enceavored to select the best material and have always been careful to employ none but the most competent workmen. I have also instituted the most careful scruteny of all of my jobs before they were placed in the sales room, and in this way have been able to supply my customers with none but the most complete work. It is to these facts that my machines owe their reputation with farmers and threshers. J. HARRIS, has enlarged his A - CONFECTIONERY SHOP, and incre CANDIES. He can fill any order from 100 lbs. to 1000 lbs. of CANDIES in from one to twenty-four hours' notice, and warrant it to be unsurpassed by that of any manufacturer either east or west. He uses only the first quality of White Sugar in making his Confectionery.

CANDIES, in Rolls, or Lumps, CANDIES, of all flavors, CANDY TOYS, of all kinds, CANDY MOTTOES, UANDIES manufactured to order, in

I have thus far found that Woodbury's patent is most sought after by threshers, and as cortificates show, it does good work and gives good missaction. The first premium was awarded to this machine at the Michigan and Ohio State Fairs, in 1838, and it has always received the first premiums at County and State Fairs, wherever exhibited, both in the United States and Canadas. I am the only manufacturer of this superior machine in the State. any style the purchaser may desire. AT BUY your CANDIES of HARRIS. BUY your CANDIES of HARRIS. I also manufacture another equally excellent machine, known as Pitts' Separator. These Separators, are, by some, highly esteemed. They are manufactured with great care and are a good machine. They have because well established and are legally celebrated both for rapid and pagient work. In manufacturing these machines I have selected such patterns only as have been fully legled by long mae; and in offering the two above I believe I offer the very best that are made. It is claimed by those who use them, that they will forcula, clean and dit for market more grain in a given time, and do it better than any

Sold at the Lowest Market Prices. You can always find Coffee, Teas, Sugars, Spices, Nuts, Raisins, Fruits (in season,)

who use them, that they will threah, clean and diffor market more grain in a given time, and do it better, than any other machine. In fact, the only limit to the amount they can thresh, depends upon the facilities at hand for getting the grain to the machine and taking care of the straw, ac, after it is threshed. These machines are, being them, atrong and durable; the joints are all fastened with holts, and are fitted up with a Cat Steel Cylinder Shaft pivoted with Brees Bors. The cylinder is 31 inches in length; and I am now making the Separator 5% inches wider man the Cylinder—making the cauvas belt grain carrier 38% inches wide. Would of thee inside, is 37 inches. The shoe is 2 inches wider than last year.

The Beater Shaft is furnished with bross boxes; hrass boxes also for Canvas Belt Shaft and Fan Shaft; sized journals with iron boxes for Fan Side Shaft; iron pulleys (leathered) and cast iron conveyor. In every particular, revolutions per minute.

In the manufacture of these machines, I have made some improvements on the original patterns, and am ready to make such other changes as experience may suggest as being valuable. And a thousand other articles which I cannot enumerate.
It is universally admitted that to get GOOD Groceries,—
and CHEAP Groceries, you should BUY Groceries of HARRIS.
